

**Class 11 Business Studies**  
**Notes**  
**CHAPTER 5**  
**EMERGING MODES OF BUSINESS**

---

**Meaning:** In this age of internet, the world commerce has gradually started linking with it. This has brought a new concept of commerce called e-commerce/e-business. Now we are capable of reaching the users of Internet all over the world simply by opening a shop on the Internet. The Internet users can order for the goods, receive their delivery and make their payment while sitting at their home on the Internet.

---

### **Scope of e-Business**

It can be understood by the view point of the parties involved and making transactions:

1. **B2B Commerce:** It is that business activity in which two firms or two business units make electronic transaction. For example- one can be producer firm and other a supplier firm.
2. **B2C Commerce - Business to customer.** In this one party is a firm and other party is a customer. On one hand a customer can seek information through Internet about products, place orders, get some items and make payments and on the other hand the firm can make a survey any time to know who is buying and can also know the satisfaction level of customers. In modern times, call centers can provide these information.
3. **Intra-B Commerce** Within business Commerce - Under it, the parties involved in the electronic transaction are the two departments of same business. For Example, through internet it is possible for the marketing department to interact constantly with the production department and get the customized goods made as per the requirement of customers.
4. **C2C Commerce - Customer to Customer Commerce -** Under it, both the parties involved in electronic transaction are customers. It is required for the buying and selling of those goods for which there are no established markets. For example- selling old car through internet.

5. **C2B Commerce** - C2B Commerce provides the Consumers with the freedom of shopping at will. Customer can make use of call centers to make toll free calls to make queries and lodge complaints.

6. **B2E Commerce** - Companies reporting to personnel recruitment, interview and selection and training etc. via B2E Commerce.

---

### **Benefits of e-Business**

The major benefits of e-Business are as follows:

1. **Worldwide reach**- Internet gives businessmen an extended market. New customers come in contact with them. This results in increase in sales.
  2. **Elimination of Middlemen** - Ever since the e-Business came into existence, the wholesalers and retailers have started disappearing. Now, most of the producers have started having direct contact with customers. As a result, the consumer get goods on less price.
  3. **Easy Distribution Process** - Many types of information and services be received on computer through e-business. This has simplified the system of distribution and has also made it less costly.
  4. **Lower Investment required** - In this, you don't require any big showroom or huge investment. You need only computer and Internet.
  5. **Easy to launch new products** - Any company can launch its new product in the market through the medium of E-Business. A complete information about the product is made available on Internet. In this way the consumer and other businessmen get information about the new product while sitting at home.
  6. **Movement towards a paperless Society** - Use of internet has considerably reduced dependence on paper work.
- 

### **Resources Required for Successful e-Business Implementation**

The resources required for the e-Business are:

1. **Computer system** - The presence of computer system is the first requirement of e-Business. The computer can be linked with Internet by just pressing its keys.
2. **Internet connection** - Internet connection is very essential and now a days we can get this facility by sitting at home.

3. **Preparing the web Page** - web page has the greatest importance in the use of e-Business. It is also known as Home Page. Any product that is to be shown on Internet is displayed on web page.

4. **Effective telecommunication system** - e-business requires an effective telecommunication system in the form of telephone lines etc.

### **On Line Transactions**

On line transaction means receiving information about goods, placing an order, Receiving delivery and making payment through medium of internet. Under this system, the sale purchase of every type of thing, information and service is possible.

---

### **Payment Mechanism**

Payment for the purchases through online shopping may be done in following ways:

1. Cash on delivery (COD) - Cash payment can be made at the time of physical delivery of goods.
  2. Net-banking transfer - The customer can make electronic transfer of funds(EFT) to account of online vendor over the internet.
  3. Credit or Debit cards - The customer can make payment for online transaction through debit or credit card by giving the number and name of bank of card.
- 

### **Security and Safety of e-Transactions**

The following methods can be used to ensure security and safety of online transactions.

1. Confirming the details before the delivery of goods - The customer is required to furnish the details such as credit card no., card issuer and card validity online.
2. Anti Virus Programmes - Installing and timely updating antivirus programmes provides protection to data files, folders and system from virus attacks.
3. Cyber crime cells - Govt. may setup special crime cells to look into the cases of hacking and take necessary action against the hackers.

## **KPO (Knowledge Process Outsourcing)**

KPO refers to obtaining high end knowledge from outside the organization in order to run the business successfully and in cost effective manner. Unlike conventional BPO where the focus is on process expertise, in KPO the focus is on knowledge expertise.

### **Need of KPO**

In today's competitive environment focus is to concentrate on core specialization areas and outsources the rest of activities. Many companies have come to realise that by outsourcing the non case activities not only costs are minimized and efficiency improved but the total business improves because the focus shifts to key growth areas of business.

### **Features of KPO**

1. It is the upward shift of BPO
2. It focuses on knowledge expertise instead of process expertise.
3. It provides all non case activities.
- 4 It has no pre-determined process to reach a conclusion.
5. It offers an alternative career path for the educated.

### **Scope of KPO/Services covered KPO**

1. Research and Technical analysis.
2. Business and Technical analysis.
3. Business and Market research.
4. Animation and Design.
